Excellence in Customer Support and Services

- **Comprehensive Technical Assistance** Offering training programs, on-site installation, and maintenance services.
- **Skilled Technicians** Ensuring prompt response and reliable support to meet customer needs.
- **Trusted Provider** As a BEE Level 2 company founded in 2021, we deliver high-quality equipment.
- **Diverse Solutions** Laser cutting, engraving, marking, and welding solutions, along with business incubator services and machine maintenance training.
- **Commitment to Innovation** Dedicated to quality and customer satisfaction, meeting the evolving demands of modern industries.
- **Proven Track Record** Supplying over 50 universities and technical institutions throughout South Africa.
- **Extended Support Hours** Available from 8am - 8pm, Mondays to Fridays.

We focus almost exclusively on ensuring that technically oriented high schools, incubators, TVET colleges and universities have the correct machines, equipment, and training for preparing students for the modern manufacturing and prototyping workplace.

At PLES, our customers are at the heart of everything we do. We are committed to providing personalised solutions and support that enables businesses to innovate and bring their ideas to life, while focusing on reducing costs and improving production efficiency.

We believe passionately that every South African and South African company must easily be able to take control of their prototyping and creative dreams, resume manufacturing in-house (rather than outsourcing), and take advantage of the oncoming consumer tsunami which can be described as *"customers who want new ideas that are customised and personalised – and they want them now"*.

As part of our ongoing support structures, we carry and supply parts for up to 7 years, produce our own technical journals, can call on over thirty of our technical staff all over South Africa, offer 8:00 am

to 5:00 pm weekdays (and Saturday 9:00 am to 2:00 pm) support, as well as after hours support up until 8:00 pm from Monday to Friday.

Additionally, we have a longstanding relationship with SEDA (Small Enterprise Development Agency) and SEFA (Small Enterprise Finance Agency), and various provincial and governmental organisations, because we put in the extra effort to keep the users of our machines productive.

To ensure financial and training success, our machines have to work. That's our job.

Some Institutions that have multiple machines from us :

- Kathu CFE Rapid Incubation Centre
- GS College, Mpumalanga
- St. Mary's School, KwaZulu-Natal
- Regent Business School, Cape Town
- Regent Business School, Gauteng
- Evolve Online School
- Kwaggasrand School
- Westview Special School
- **Over 50+ TVET** Colleges and Technical High Schools

Our Offerings

Laser Engraving and Cutting CO² Machines

Unlock precision and efficiency with advanced laser cutting machines. Perfect for materials like metal, wood, acrylic, fabric, rubber, and paper, these versatile machines cater to industries such as manufacturing, signage, automotive, jewellery, textiles, advertising, and packaging.

Discover how cutting-edge technology can enhance your business with unparalleled cutting, engraving, and marking capabilities.

Fiber Cutter and Metal Engraving Machines

Achieve precision and efficiency with advanced cutting machines. Ideal for materials like metal, these versatile machines serve industries including manufacturing, construction, automotive, and interior design. With cutting-edge technology, you can achieve high-speed precision machining, from prototyping to full-scale manufacturing.

Elevate your production capabilities with state-of-the-art cutting machines.

Office Hours: Monday - Friday 8:00am to 8:00pm

Eco Solvent Colour Signage Printers

Create vibrant and durable signage with eco solvent printers. Perfect for applications such as signage, banner printing, and sticker printing, these printers offer high-quality, environmentally friendly solutions. They are ideal for materials like vinyl, fabric, and paper, making them a versatile choice for industries like advertising, textiles, and packaging.

Enhance your business operations with high-speed, precision printing and a reduced environmental footprint.

T-Shirt Printing Machines

Boost your creativity and profitability with advanced T-shirt printing machines. Ideal for custom designs on T-shirts, mugs, caps, and more, these versatile heat press machines are perfect for small businesses and hobbyists. They are easy to use and offer high-quality, durable prints on materials like fabric, ceramic, and metal. With their user-friendly interface and reliable performance, you can effortlessly produce professional-grade products.

Transform your business with endless customization possibilities using our various size T-shirt printing machines and accessories.

Home Business Sublimation Colour Printers

Elevate your home business with advanced sublimation colour printers. Perfect for custom designs on T-shirts, mugs, caps, and more, these versatile printers deliver high-quality, durable prints on materials like fabric, ceramic, and metal.

Take your home business to the next level with state-of-the-art sublimation colour printers.

UV Corporate Colour Gifting Printers

Enhance your corporate gifting with advanced UV printers. Ideal for personalized gifts and promotional items, these versatile printers deliver high-quality, durable prints on materials like metal, glass, wood, stone, plastic, fabric, and vinyl. Using cutting-edge technology, they cure inks instantly with ultraviolet light, ensuring vibrant and long-lasting results.

Upgrade your corporate gifting solutions with innovative UV colour printers.

Wood and Aluminium Furniture CNC Machines

Revolutionize your furniture production with advanced CNC machines. Ideal for cutting, engraving, and milling wood and aluminium, these versatile machines cater to industries like furniture manufacturing, interior design, and custom woodworking. They offer high-speed precision machining, ensuring high-quality and consistent results for all your projects.

Enhance your production capabilities with innovative high precision CNC machines.

PERFECT LASER ENTERPRISE SOLUTIONS

The team that serves our PLES Customers

Fiber and Wazer Water Jet Machines

Enhance your manufacturing capabilities with advanced fiber and Wazer water jet machines. Fiber laser cutters are perfect for cutting metal for parts, signage, and components, offering high-speed precision machining. The Wazer water jet machines are ideal for cutting a wide range of materials including metal, glass, wood, stone, plastic, fabric, and vinyl, using high-pressure water and abrasive particles for precise and clean cuts.

Optimize your production process with innovative fiber and water jet machines.

Business Incubator Services and Machine Maintenance Training

PLES supports entrepreneurs and startups in the laser industry with our business incubator services. Gain access to guidance, mentorship, and resources to navigate the challenges of starting and growing your venture. growth.

Ensure optimal performance and longevity of your laser equipment with PLES's comprehensive machine maintenance training programs. Learn routine maintenance procedures, troubleshooting techniques, and best practices for machine care.

Contact us now and improve your skills and how to operate at your optimal best!
